

# Take Transit to the Next Step

## The Puzzle for Public Transit:

- Improve the way public transit is used and managed by leveraging sensors and connectivity
- Align with public expectations for mobile-based, convenient access to services
- Support multi-modal services
- Deliver seamless journeys and scale with technical complexity
- Optimize multi-experience services with insight and proactive decision-making

## Does your organization have all the pieces?

Upgrade enterprise systems to rapidly deliver value

Build resilient, innovative solutions that scale

Improve operational efficiency with reusable components

Empower all employees with digital skill sets to enrich solutions

Enable a responsive organization with multiexperience capabilities

Utilize real-time data and reporting

# Mendix helps public transit authorities accelerate modernization and innovation

## Leader in:

- Forrester Wave 2021 for Low-Code
- Gartner Magic Quadrant 2021 for Low-Code
- Gartner Magic Quadrant 2021 for Multi-Experience Development Platforms

### Bring your enterprise systems up to speed

ProRail upgraded its core systems operation with 37 apps on the Mendix platform, creating operational efficiency gains and reducing development time by 5x.

### Make a difference, quickly

Amsterdam Airport Schiphol developed a new Mendix-built app that enables floor managers to handle all their processes from a mobile device in just 90 seconds.

### Modernize public transit

Dutch Railways replaced an end-of-life application with a Mendix app, providing an integral overview of the rail network, a messaging system, and a uniform audit trail to reconstruct timelines and help evaluate incidents on the transit network.
